After stripping the insulation, a suitable contact or wire end ferrule can be crimped onto the end of the cable. Crimping forms a secure connection between conductor and contact and has largely replaced soldering. Crimping denotes the creation of a homogeneous, permanent connection between conductor and connecting element. The connection can be made only with high-quality precision tools. The result is a secure and reliable connection both in mechanical and electrical terms. Weidmüller offers a wide range of mechanical crimping tools. Integral ratchets with release mechanisms guarantee optimum crimping. Crimped connections made with Weidmüller tools comply with international standards and regulations.

**General ordering data**

Version	Pressing tool, Replacement part
Order No.	<a href="#">1121010000</a>
Type	ERTE GRIFFE CTO
GTIN (EAN)	4032248902118
Qty.	1 items

## Technical data

### Dimensions and weights

Depth	37.5 mm	Depth (inches)	1.4764 inch
Height	35.5 mm	Height (inches)	1.3976 inch
Width	178 mm	Width (inches)	7.0079 inch
Net weight	41.5 g		

### Environmental Product Compliance

RoHS Compliance Status	Not affected
REACH SVHC	No SVHC above 0.1 wt%

### Technical data

Version	Replacement part for crimping tool, pair of handles, CTO
---------	--
