After stripping the insulation, a suitable contact or wire end ferrule can be crimped onto the end of the cable. Crimping forms a secure connection between conductor and contact and has largely replaced soldering. Crimping denotes the creation of a homogeneous, permanent connection between conductor and connecting element. The connection can be made only with high-quality precision tools. The result is a secure and reliable connection both in mechanical and electrical terms. Weidmüller offers a wide range of mechanical crimping tools. Integral ratchets with release mechanisms guarantee optimum crimping. Crimped connections made with Weidmüller tools comply with international standards and regulations.

General ordering data

| | |
|------------|---------------------------------|
| Version | Pressing tool, Replacement part |
| Order No. | 1121010000 |
| Type | ERTE GRIFFE CTO |
| GTIN (EAN) | 4032248902118 |
| Qty. | 1 items |

Technical data**Dimensions and weights**

| | |
|------------|---------|
| Depth | 37.5 mm |
| Height | 35.5 mm |
| Width | 178 mm |
| Net weight | 41.5 g |

| | |
|-----------------|-------------|
| Depth (inches) | 1.4764 inch |
| Height (inches) | 1.3976 inch |
| Width (inches) | 7.0079 inch |

Environmental Product Compliance

| | |
|------------------------|-----------------------|
| RoHS Compliance Status | Not affected |
| REACH SVHC | No SVHC above 0.1 wt% |

Technical data

| | |
|---------|----------------------------------------------------------|
| Version | Replacement part for crimping tool, pair of handles, CTO |
|---------|----------------------------------------------------------|
