The protective housing is manufactured from seawater-resistant aluminium using pressure die casting.
High standards of water and dust protection, as well as particularly high impact resistance, are the hallmarks of this housing series.
A sophisticated two-stage surface coating ensures years of reliability.
All screws, crimp contacts and other exterior accessory parts are made of corrosion-resistant stainless steel.

Important note

Product information	Depending on the intended operation, internally generated voltages can superimpose the working voltage and contain corresponding peaks. It is imperative to ensure that these peak voltages do not exceed the rated voltage. For applications outside of this specification, please contact us.
