## Accessories

## Blocks for PCB mounting

Minor component, major effect:

Clip-on attachment elements increase the mechanical resilience of the whole plug connection by

- securing the male connectors to the circuit board
- providing a vibration-proof connection between the sockets and the male connectors

Clip-on or pre-assembled - always the right solution:

- Hard-wearing, precise fitting dovetail joint
- Hard-wearing metal threaded inserts
- Suitable for all outlet directions

Maximum stability, minimum effort:

- Extremely resilient for frequent fastening operations
- Complete set for easy selection

The result: soldering points, contacts and overall module are more resilient against mechanical stress such as vibrations and tensile loads.

## Coding elements

Only connects what is supposed to be connected: the right connection at the right place.  
Coding elements and locking devices clearly assign connecting elements during the manufacturing process and operation  
The coding elements and locking devices are inserted prior to assembly or during the cable assembly phase.  
The Weidmüller alternative: configure online using the variant configurator to precode prior to delivery.  
Incorrect assembly on the circuit board and incorrect plugging of connecting elements is no longer possible.  
The advantage: no troubleshooting during manufacture and no operational errors by the user.

## Strain reliefs

For frequent load changes: the "trailer coupling" for plug-in connectors.  
The strain relief can do more than just relieve the strain on conductors:  
Simply clip onto the plug and

- bundle conductors
- guide cables
- use as a connection and disconnection aid

No damage to the connecting points, clear, tidy wiring and easy to handle.  
User advantages: permanent heavy-duty connections for harsh industrial environments and convenient operation ensure improved system availability.
