Isolating amplifiers, passive isolators, limit switches and measuring transducers – including temperature transducers – in a terminal-block design.

Ideal for precise signal processing and reliable signal isolation in limited installation space.

- Compact 6 mm design – as flat as a terminal block
- Operating temperature up to -40 °C ... $+70\text{ °C}$ (model-dependent)
- Versions with screw or PUSH IN connection
- Selected models include QR code and status LED for easy identification

Part description

Product description	The passive Isolator PicoPak-CI-CO-LP separates stand- analogue current signals. An analogue input current signal is converted linear and galvanic isolated into an analogue out- put current signal. The power supply occurs through the input and output measuring circuit. The measuring range can be adjusted if necessary via the potentiometers (Zero and Span) installed on the front.
