Advanced functionality of energy data capture
 The scope of performance of the ValueLine energy meters goes beyond the core functions of energy measurement.
 They are also suitable for determining, storing and visualising further energy quality parameters.
 The free "ecoExplorer go" software is available for most types of the product group,
 on the one hand for device configuration / commissioning / visualisation of the measured values and on the other hand for analysing the power quality.

Plug-on current transformer - ValueLine

Plug-on current transformers

Plug-on current transformers are used wherever high currents of up to 5000A need to be measured and processed. Our plug-on current transformers supply secondary currents of 1A or 5A. Weidmüller also offers compact low-power current transformers to convert currents of up to 600 A to voltages of up to 333 mV.
