CC-DT-H 15/49 BL

We support our customers in the food industry with detectable marking solutions to ensure the high standards required within the framework of the HACCP concept. Thanks to a metallic filler, our detectable MultiCards can be reliably identified by metal and X-ray detectors. This minimises the risk of product contamination in the production process. Maximum safety is ensured with important product properties, such as corrosion resistance or higher ageing resistance to UV radiation in indoor areas and heat. These properties are regularly tested and confirmed in our own accredited laboratory. Not suitable for direct food contact.

• Detectable by metal and X-ray detectors

• Visually recognisable by blue colour

• Corrosion resistant metallic filler

• Clear and resistant print image

• Available in different versions for a wide variety of marking requirements
