U-OS-EML-RT-M

With Weidmüller Industrial AI products, you can take advantage of advanced analytics to optimise operations, improve product quality and create new business models. As a machine or process expert, you can create and operate machine learning models quickly and easily, without prior knowledge of data science.

ModelBuilder allows you to transform your data and domain knowledge into ML models that generate added value for your company. edgeML enables particularly simple and flexible integration of ML models - regardless of the hardware and using the ONNX format. This means that machines or processes can be monitored directly on site, without delays or additional costs.
