Power supply adapter modules for separate supply and distribution of the supply voltage: for the ACT20 series/ MICROSERIES signal converters.

The 22.5/6.1 mm wide power-feed modules are mounted directly adjacent to the analogue signal converters. Then the 24 VDC supply voltage is optionally bridged via the CH20M (ACT20-series) rail bus or simply bridged over using the pluggable ZQV 4N (MICROSERIES) cross-connectors.

The ACT20-Feed-In-PRO-S can also detect faults coming from any of the devices mounted on the CH20 bus mounting profile.

In the event of an error or fault, the integrated status relay sends a common alarm to the external controller. In addition, two power supply units (as primary and backup supply) can be connected to the ACT20 Feed-In PRO-S. Two feed-in modules mounted to the CH20 bus mounting profile guarantee a 100% redundant power supply.

Three LEDs are used to show the status of the power supply and error messages.

The ACT20M-Feed-In PRO can also be used in Ex zone2 / Division2 applications.

### Part description

Product description	<p>The power-feed unit ACT20-FEED-IN-PRO-S distributes the supply voltage for the ACT20 range of devices to the Weidmüller CH20M DIN rail bus. The device also has a connection for a backup power supply. Installation is basically on the Weidmüller CH20M DIN rail bus.</p> <p>Properties</p> <ul style="list-style-type: none"> <li>• The power-feed unit ACT20-FEED-IN-PRO-S detects errors on each of the devices mounted on the Weidmüller CH20M DIN rail and sends a collective message to an external controller via the internal status relay.</li> <li>• Two power supplies for the primary and secondary supply (backup) can be optionally connected.</li> <li>• A redundant power supply can be set up using two power-feed units and two separate power supplies.</li> <li>• The status relay is activated when the following conditions are met: ◇ The supply voltage is on the connection terminals 51 and 52 ◇ The backup supply voltage is on the terminals 53 and 54. If the backup power supply is not required, the supplied jumper needs to be inserted between terminals 52 and 53. ◇ The devices mounted on the Weidmüller DIN rail do not report any errors</li> <li>• The device can be used in safe (non-explosive risk) areas or in Zone 2 / Division 2.</li> <li>• The operating status of the power supply and the backup power supply is indicated with two green LEDs.</li> <li>• A malfunction is indicated with a red LED.</li> </ul>
