After stripping the insulation, a suitable contact or wire end ferrule can be crimped onto the end of the cable. Crimping forms a secure connection between conductor and contact and has largely replaced soldering. Crimping denotes the creation of a homogeneous, permanent connection between conductor and connecting element. The connection can be made only with high-quality precision tools. The result is a secure and reliable connection both in mechanical and electrical terms. Weidmüller offers a wide range of mechanical crimping tools. Integral ratchets with release mechanisms guarantee optimum crimping. Crimped connections made with Weidmüller tools comply with international standards and regulations.

General ordering data

Version	Pressing tool, Replacement part
Order No.	9202810000
Type	ERTE GRIFFE PZ
GTIN (EAN)	4032248512577
Qty.	1 items

ERTE GRIFFE PZ**Weidmüller Interface GmbH & Co. KG**Klingenbergstraße 26
